

Skin Correctives

PARAMEDICAL DERMAL CLINIC

30 July 2009

To whom it may concern

TESTIMONIAL

Skin Correctives is proud to be associated with Lamelle Research Laboratories. It is our aim to provide our clients with skin solutions that offer dramatic results. Products that are powerful, yet safe. Lamelle offers us this combination. The powerful synergy of product and knowledge.

Being in the Health and Skin Care Profession for 17 years, I have learnt that working with advanced products and treatments, your results are only as good as the education and support provided. This is what truly sets Lamelle aside from the rest. Providing evidence based research and advanced training on an ongoing basis, one is able to confidently perform advanced procedures. Besides training, Dr. Bradley Wagemaker is always available when medical advice is needed.

The support from the Lamelle team is incredible. Although the company is based in Johannesburg, we experience 100% support in Cape Town thanks to our professional and dedicated representative, Michelle.

Thanks to Tony and the team, we are able to offer an attractively packaged medical product. We are provided with beautifully designed brochures and other marketing material which provides clients with detailed information on products and treatments. The support in this department is also outstanding.

Orders and accounts are dealt with optimal efficiency. Don and his staff are always ready to assist and orders are received in good time ensuring that there are no stock flow problems. Stock issues are often a huge problem in the industry, so I am very impressed.

I have had great success with the Ovelle supplements, the Dermaroller for collagen induction therapy and the Dermaheal range just to high-lite a few. Since the launch of the Luminesce range, I have several clients using the product and have noted improvement in some stubborn cases. Since it has only been a few weeks, I am astonished. I have never seen a product for pigmentation designed with such incredible detail. The Lamelle's professional range offers the skin technician endless options in the treatment of the skin in the clinic.

We have been performing the Mattioli Microdermabrasion and Dermoelectroporation treatments in the clinic for the past few years. FDA approval of these units (for which Lamelle was selected as the sole agent in South Africa) and the Dermarollers (which are the only FDA approved skin rolling device available in South Africa), further supports the fact that quality and safety is the number one priority at Lamelle Research Laboratories.

I am truly grateful that I am able to offer my clients the most advanced technology in the field of skin therapy. You have set a new standard in our industry.

Thank you Lamelle Research Laboratories!

Yours sincerely

Karen Meiring de González
