

Make-up Dos And Dont's

Long Live Lashes!

With thick long lashes, you can afford to go without much in the way of eye make-up if the desire calls. Treat your lashes to a few mascara-free days a week to recuperate, and you will notice how much healthier they can look. Use eyelash enhancer on a daily basis to condition and enhance your natural lashes.

Subtle Browns

A natural make-up look doesn't mean not wearing any make-up at all. Soft brown hues will add to your look by just softly creating interest in the correct areas.

Minimal Make-up = Maximum Impact

Less is definitely more when it comes to all aspects of make-up. Lucy Liu lets her freckles show through a light covering of foundation and rosy cheeks, immediately giving her a fresh healthy finish.

Less Black, More White

Line your eyes with a white liner rather than the usual harsh black and watch in wonder as your eyes appear larger and your look fresher. You can also blend the white liner over the lid for an eye popping spring look.

The New Smoky Look

For a softer smoky look, replace your harsh charcoal and black shadows with brown and bronzes. Apply these shades all the way around the eye and line with a natural brown eyeliner.
